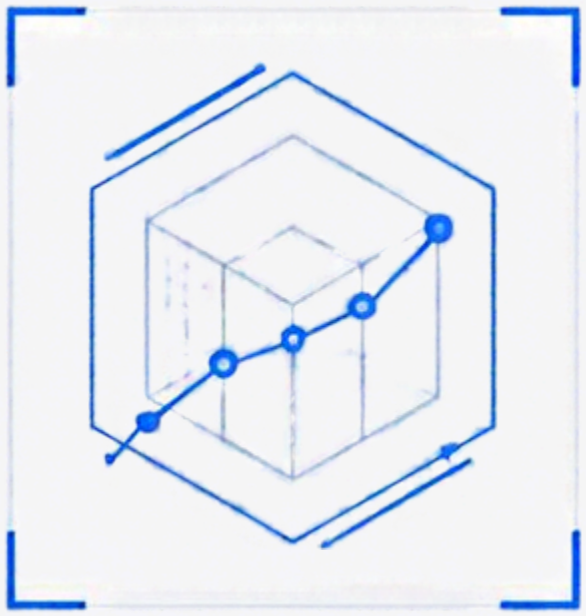
NK

NIKHIL KUMAR JENA

PROFILE & EXPERIENCE



PROFESSIONAL SUMMARY

Results-oriented Data Analyst and AI Developer with practical enterprise experience in data validation, schema migration, and modern AI workflows. Proficient in Python, SQL, and Advanced Excel, with strong technical grounding in Large Language Models (LLMs), LangChain, LangGraph, Retrieval-Augmented Generation (RAG), and agentic systems. Demonstrated ability to validate enterprise staging environments (SAP DMC/LTMC), automate data processing pipelines, and construct scalable AI applications.

02

DATA ANALYST & AI DEVELOPER

EXPERIENCE

Akarshika IT Consulting — Trainee Analyst / Data Analyst Intern

Balasore, Odisha, India | September 2025 – April 2026

- Cleansed, transformed, and mapped enterprise datasets using Advanced Excel (Power Query, XLOOKUP, DAX) and SQL, ensuring schema accuracy across staging environments.
- Engineered and validated compliance-ready staging upload templates for SAP DMC and LTMC migration cockpits, mitigating data reconciliation errors.
- Maintained strict data integrity across core enterprise structures, including Routings, Work Centers, Asset configurations, and Customer Master records.
- Automated recurring data verification workflows and created standardized management dashboards and corporate presentations for operational reviews.

TECHNICAL SKILLS

Prompt Engineering & API Integration

Design advanced prompts, integrate with LLM APIs and handle responses safely and reliably.

NLP & Retriever (RAG)

Process text, create embeddings and build retrieval systems for accurate AI responses.

AI Agents & Multi-Agent Systems

Build autonomous agents, orchestrate workflows and enable collaboration between agents.

Deployment & Project Integration

Build APIs, containerize apps and deploy scalable AI solutions in cloud infrastructure.

AI-Assisted Development with Agentic IDEs

Use AI agents in IDEs, automate workflows and accelerate software development.

Neural Networks & Transformers

Understand deep learning foundations and transformer architectures.

Fine-Tuning LLMs

Fine-tune open models, optimize with LoRA/QLoRA and serve reliably at scale.

Evaluation & Observability

Evaluate AI outputs, monitor systems and ensure quality and reliability in production.

04

TECHNICAL CORE

Python	Hugging Face	Hugging Face API	LLM API
Postman	LangChain	Llamaindex	Hugging Face Embeddings
Embeddings	FAISS (Vector Search)	Pinecone (Vector DB)	LangGraph
AutoGen	CrewAI	Hugging Face Tools	LangSmith
MCP SDK	FastAPI	Docker	Kubernetes
Google Cloud (GCP)	Cloud Run	LangServe	Primehedge
Grafana	Langfuse	Codex	Claude Code
Antigravity	PyTorch	TensorFlow	Keras
Hugging Face Transformers	vLLM	Ollama	

CONSULTING

- **Excel** – AI-Advanced Excel (XLOOKUP, Power Query, DAX, Power BI)
- **Project Management Tools** – Enterprise Data: BOM, Work Centers, Routines, Asset Management, SAP DMC Uploads

SELECTED PROJECTS

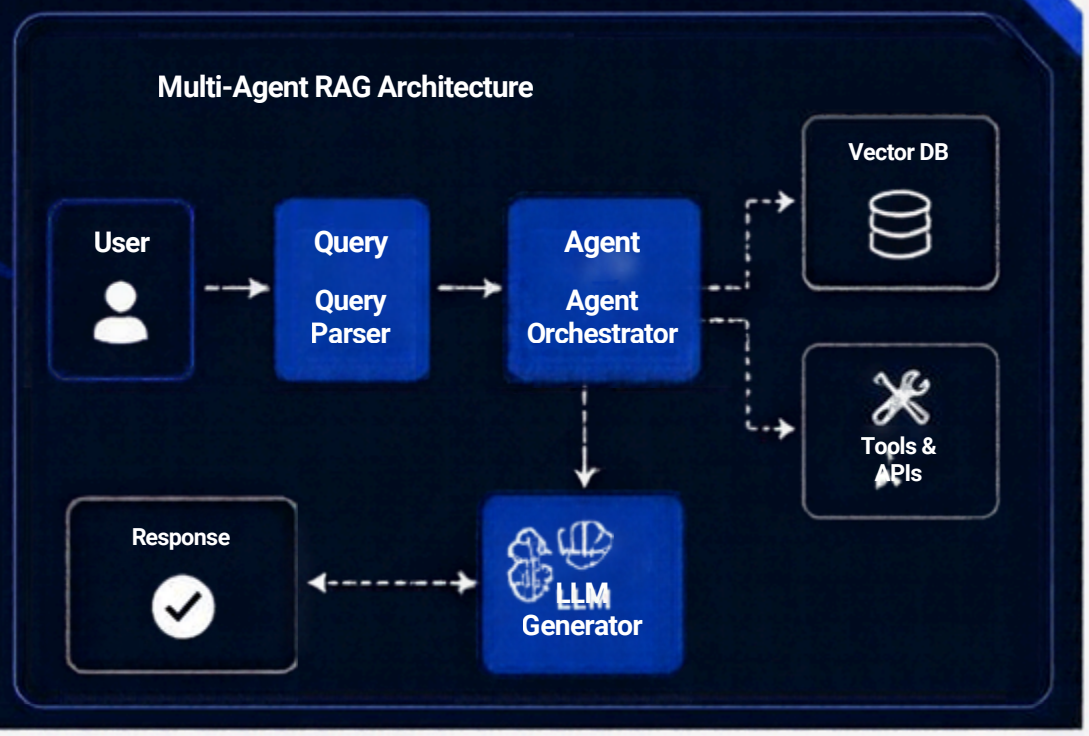
01 Multi-Agent AI Systems & Custom RAG Frameworks | Python, LangChain, LangGraph, Vector DBs

Architected multi-agent reasoning workflows utilizing LangGraph and LangChain for automated context retrieval, query parsing, and multi-turn task routing.

Constructed Retrieval-Augmented Generation (RAG) pipelines integrated with local and cloud vector databases, improving grounded accuracy in factual summarization.

Built dynamic user interfaces using Streamlit and Gradio to test model evaluation, latency benchmarks, and autonomous agent executions.

github.com/jenanikhil39



02 Delinquency Prediction & Credit Risk Intelligence | Tata Group (Forage Simulation) | Python, AI Strategy

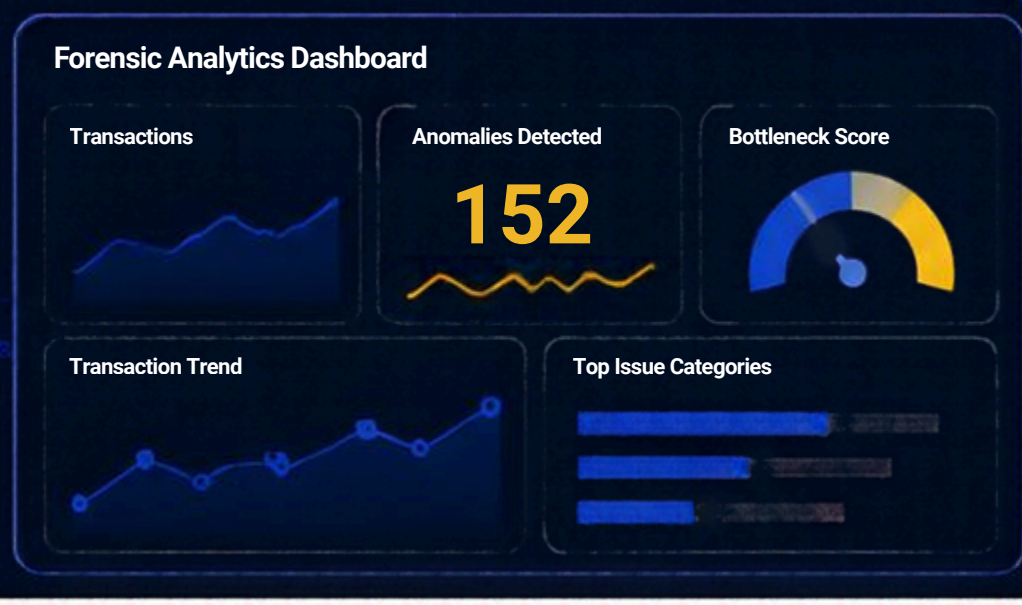
Conducted exploratory data analysis (EDA) across financial records to detect default patterns and segment delinquent borrower profiles.

Leveraged machine learning classification concepts to generate risk mitigation strategies and synthesised automated data storytelling reports for stakeholders.

03 Forensic Technology Data Analytics | Deloitte Australia (Forage Simulation) | Tableau, Advanced Excel

Analyzed large forensic transactional datasets to pinpoint operational inconsistencies, transaction bottlenecks, and trend anomalies.

Designed comprehensive interactive Tableau and Excel dashboards delivering actionable insights for enterprise risk assessment.



NIKHIL KUMAR JENA

AI & DATA PROFESSIONAL

06

TECHNICAL CAPABILITIES

01

Programming & AI Core:
Python, SQL, Generative AI, Agentic AI,
Multi-Agent Frameworks,
Large Language Models (LLMs)

02

Frameworks & Tools:
LangChain, LangGraph, LlamaIndex,
RAG Pipelines, Vector Databases,
Fine-Tuning (LoRA/QLoRA), n8n

03

Analytics & BI:
Advanced Excel (Power Query, Power Pivot,
DAX, XLOOKUP, Dynamic Arrays),
Tableau, Power BI

04

Enterprise Data:
Master Data Management, Bill of Materials (BOM),
Routings, Work Centers,
SAP DMC/LTMC Staging

05

Development & Ops:
Git, GitHub, Streamlit, Gradio,
Linux / Shell Basics,
API Integration

Focus areas: Prompt Engineering & API Integration
AI Agents & Multi-Agent Systems
NLP & Retrieval-Augmented Generation
Deployment & Project Integration
Evaluation & Observability

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech) in Computer Software Engineering

Satya Sai Engineering College (SSEC), BPUT — Balasore, Odisha | 2023 – 2027

Relevant Coursework: Database Management Systems (DBMS), Data Structures & Algorithms, Software Engineering, Cloud Computing

CERTIFICATION

Generative AI & Agentic AI with Python —
Naresh i Technologies (LangChain, LangGraph, RAG, LlamaIndex, Vector DBs, Fine-Tuning LoRA/QLoRA, n8n)

CERTIFICATION

GenAI-Powered Data Analytics Certificate —
Tata Group / Forage

CERTIFICATION

Introduction to Artificial Intelligence (AI) —
Coursera

CERTIFICATION

IoT, Embedded Systems & Programming (Raspberry Pi & Python, Arduino & C) —
UC Irvine / Coursera

NKJ

LET'S BUILD WITH DATA & AI

Data Analyst | Generative AI & Agentic AI Developer | Python & SQL

Open to entry-level opportunities in data analytics,
AI applications, and enterprise technology.
